

SHIV RAJAWAT

Full Stack AI Engineer

Indore, M.P. | 7007094154 | shiva2003rajawat@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack AI Engineer with 2.6+ years of experience building scalable web applications, backend services, workflow automation solutions, and AI-powered business applications using Python, React.js, Next.js, Node.js, and cloud technologies. Experienced in REST API development, database architecture, automation workflows, AI assistant integrations, and production deployments. Hands-on experience with OpenAI APIs, LangChain, RAG concepts, AI agents, n8n automation, and conversational AI systems, with a strong focus on building intelligent and scalable automation solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS
- **Frameworks & Libraries:** React.js, Next.js, Redux, Node.js, Express.js, Nest.js, Tailwind CSS, Mongoose, LangChain, CrewAI (Hands-on Learning)
- **Databases:** MongoDB, MSSQL, PostgreSQL
- **Vector Databases:** Pinecone, ChromaDB
- **AI & Automation:** OpenAI API, Google Gemini API, Prompt Engineering, AI Assistants, AI Agent Workflows, LangChain, RAG Fundamentals, Embeddings, Vapi Voice AI
- **Cloud & DevOps:** AWS Cloud, Docker, CI/CD, Git/GitHub
- **Tools & Practices:** n8n, Make.com, Zapier, Postman, Figma, Jira, Agile, MVC, VS Code

WORK EXPERIENCE

Full Stack Developer

May 2025 – Present

Webiwork Technologies Pvt. Ltd. (Indore, India)

- Developed and maintained scalable full-stack applications using React.js, Next.js, Node.js, Express.js, and Python.
- Built optimized REST APIs, webhooks, and third-party integrations supporting workflow automation and business applications.
- Developed AI-powered proof-of-concepts using OpenAI/Gemini APIs, LangChain, and Retrieval-Augmented Generation (RAG) concepts for intelligent information retrieval.
- Built automation workflows using n8n to integrate business systems, automate notifications, and streamline operational processes.
- Experimented with AI agent workflows using LangChain and CrewAI for task orchestration and conversational AI use cases.
- Led backend architecture improvements focusing on performance, scalability, and maintainability
- Collaborated with cross-functional teams to deliver high-quality, production-ready features

Software Developer

October 2023 – April 2025

Mind Coders (Indore, India)

- Built and deployed 5+ production-grade applications including LMS and CRM platforms
- Improved application performance and accessibility using React Profiler and Lighthouse audits
- Integrated REST APIs using Redux Toolkit and custom hooks for efficient state management
- Developed reusable UI components and scalable frontend architecture
- Optimized frontend performance, reducing load time and improving user experience

Software Developer Intern

July 2023 – September 2023

Mind Coders (Indore, India)

- Contributed to development of production-grade React.js applications
- Assisted in performance optimization and debugging using modern development tools

- Gained hands-on experience in full-stack development and agile workflows

PROJECTS

AI Knowledge Assistant – RAG-Based Document Intelligence Platform

Python, FastAPI, OpenAI API, LangChain, Pinecone, React.js, Docker

- Developed an AI-powered document intelligence platform enabling semantic search and contextual question-answering across uploaded documents.
- Implemented Retrieval-Augmented Generation (RAG) workflows using LangChain, OpenAI APIs, and vector embeddings for accurate information retrieval.
- Integrated Pinecone vector database for semantic search, document indexing, and embedding-based retrieval.
- Built REST APIs using FastAPI for document ingestion, search, and AI-powered response generation.
- Designed automated document processing workflows to improve information accessibility and reduce manual search effort.
- Dockerized application services and implemented scalable backend architecture for deployment and maintenance.

Maidway – AI-Integrated SaaS Platform for Service Businesses

Replit, React + Vite, Node.js, Express.js, Tailwind CSS, PostgreSQL, Vapi

- Integrated AI-powered voice agents using Vapi to automate customer interactions, appointment scheduling, and booking workflows.
- Developed conversational AI workflows for customer support, appointment reminders, and service inquiries.
- Built automation pipelines using Twilio and SendGrid to reduce manual communication and improve operational efficiency.
- Implemented intelligent scheduling and recurring booking workflows supporting 24/7 service automation.
- Developed analytics dashboards for business insights and performance monitoring.

AimQTest – Career Guidance & Counselling Platform

Python, React.js, Node.js, NestJS, MongoDB, REST APIs, WebSockets, JWT, Docker

- Built an AI-powered career guidance platform enabling personalized career recommendations based on student assessments.
- Developed scalable REST APIs and backend services for assessments, report generation, and counselling workflows.
- Implemented real-time counselling features using WebSockets to improve student-counselor engagement.
- Designed recommendation workflows to provide career guidance and skill development suggestions.
- Developed reusable React.js components and optimized application performance for a seamless user experience.
- Implemented secure authentication and role-based access control using JWT and Dockerized application services for deployment.

EDUCATION

Bachelor of Technology

RGPV University

July 2019 – May 2023

CERTIFICATES

Full Stack Web Development

May 2023

- Completed a hands-on program covering front-end and back-end development, database management, API integration, and deployment practices
